## AUTODESK® CERTIFIED USER EXAM

Are you an aspiring building design and construction professional? Would you like to expand your Autodesk Revit® Architecture software skills and prove your proficiency?

Advance your career by becoming an Autodesk Revit® Architecture Certified User. Whether you're a student or a professional, this software certification will validate your skills, fulfill academic and industry requirements, and boost your design career.

### ACU EXAMS

As Autodesk's exclusive provider for the Certified User program, Certiport makes Autodesk Revit® Architecture certification easier with a unique three-step pathway:

1. **LEARN** (or review) how to use Autodesk Revit® Architecture with content-rich textbooks, online courseware, video resources, and more.
2. **PRACTICE** by using interactive exam-preparation tools and practice exams. Build the confidence you need to take the Autodesk Revit® Architecture Certified User Exam.
3. **CERTIFY** and validate your skills by passing the exam and receiving your official certificate.

We've designed the Autodesk Revit® Architecture Certified User program for those who are relatively new to the software and want to prove their basic proficiency.

The Autodesk Revit® Architecture Certified User Exam includes multiple-choice and performance-based questions. Following are some examples of software aspects covered in the exam:

- Navigating the user interface and managing files
- Working with views, including creating camera views

- Creating levels, walls, doors, and windows
- Handling components, columns, and grids
- Creating stairs, railings, roofs, and floors
- Sketching, annotating, and scheduling

Before you take the Certified User exam, we recommend that you complete a 3D design course at a secondary institution and get 50 hours of hands-on experience with Autodesk Revit® Architecture (a free student version is available). For information about available resources to help you learn, practice, and certify, contact your Certiport representative.
